Concept

Twisted will be a web application for yarn lovers, knitters and crocheters to browse, collect, contribute, buy, and sell patterns. The interface will allow for easy interactions between pattern contributors and users by way of comments. E-commerce features will be available with pricing determined by the pattern contributors. Users may create collections of their favorite patterns and of their purchases.

User Stories

<https://app.asana.com/0/1174623402690841/board>

Visiting Users (Users with out an account)

A visiting user can create an account (high)
